

## TYPES OF VENATION 2

A ***pinnately-veined*** leaf has one primary vein (or midrib) with smaller veins arranged on either side of it.

(Oak, Chestnut, Holly, Cherry, Lilac)

Latin:

*pinnatus* – feathered

A ***palmately-veined*** leaf has more than one primary vein. These veins start from a common point at the base of the blade and extend in different directions, like fingers extend from the palm of the hand.

(Ivy, Sycamore, Castor Bean)

Latin:

*palmatus* – shaped  
like the palm of  
the hand
